

Gameboard for "No Pencils!"

2 digits	X 1 digit =	Target #
		100
		200
		400
		800

No Pencils!!

Materials: deck of cards, face cards removed

- 1) Each player needs a gameboard.
- 2) The first player draws 3 cards and places each card in one of the boxes on his/her gameboard, in any order.
- 3) The second player does the same. Each player takes his/ her turn until the game board is full.
- 4) Once full each player estimates the answer and writes it in the target # column. They then check all their answers with a calculator to see how close they were.

If your answers are: Within 50 points... 2 points.

Within 20 ... 5 points.

Within 10... 10 points.

The player with the highest points wins!!
